

Section R: Efficiency Parameters from Flue Gas To be filled by the Energy Consultancy.			
	<i>Instructions: Flue Gas Parameters are to be measured at cell-out points of <u>ALL</u> emissions sources and their APCMs, where possible, in the Industry.</i>		
R1.1	Industry ID	GJS ____ ____ ____	
R1.2	Industry Name		
R1.3	Consultant team code		
R2.1	Date of Testing (DD/MM/2018)	__ __ / __ __ / 2019	
R2.2	Time of Testing (24-hour format)	Start Time _____ hrs _____ mins End Time _____ hrs _____ mins	
R3	EMISSIONS SOURCE:	<input type="checkbox"/> Boiler <input type="checkbox"/> Thermopack (TPH)	
R3.1	Feed Water Temperature		° Celsius
R3.2	COMBUSTION PARAMETERS	O ₂	%
R3.3		CO ₂ (calculated)	%
R3.4		CO	%
R3.5		Excess Air	%
R3.6	Pressure at Boiler/TPH cell-out		mmWC
R3.7	Temperature at Boiler/TPH cell-out		° Celsius
R4	Component 1: (Air pre-heater/Water pre-heater/ Economizer/Gravity Settling Chamber/Cyclone/Scrubber/ Bag Filter/ESP)		
R4.1	Pressure at Component 1 outlet		mmWC
R4.2	Temperature at Component 1 outlet		° Celsius
R5	Component 2: (Air pre-heater/Water pre-heater/ Economizer/Gravity Settling Chamber/Cyclone/Scrubber/ Bag Filter/ESP)		
R5.1	Pressure at Component 2 outlet		mmWC
R5.2	Temperature at Component 2 outlet		° Celsius

Comments:

R6	Component 3: <i>(Air pre-heater/Water pre-heater/ Economizer/Gravity Settling Chamber/Cyclone/Scrubber/ Bag Filter/ESP)</i>		
R6.1	Pressure at Component 3 outlet		mmWC
R6.2	Temperature at Component 3 outlet		° Celsius
R7	Component 4: <i>(Air pre-heater/Water pre-heater/ Economizer/Gravity Settling Chamber/Cyclone/Scrubber/ Bag Filter/ESP)</i>		
R7.1	Pressure at Component 4 outlet		mmWC
R7.2	Temperature at Component 4 outlet		° Celsius
R8	Component 5: <i>(Air pre-heater/Water pre-heater/ Economizer/Gravity Settling Chamber/Cyclone/Scrubber/ Bag Filter/ESP)</i>		
R8.1	Pressure at Component 5 outlet		mmWC
R8.2	Temperature at Component 5 outlet		° Celsius
R9	Component 6: <i>(Air pre-heater/Water pre-heater/ Economizer/Gravity Settling Chamber/Cyclone/Scrubber/ Bag Filter/ESP)</i>		
R9.1	Pressure at Component 6 outlet		mmWC
R9.2	Temperature at Component 6 outlet		° Celsius
R10	Component 7: <i>(Air pre-heater/Water pre-heater/ Economizer/Gravity Settling Chamber/Cyclone/Scrubber/ Bag Filter/ESP)</i>		
R10.1	Pressure at Component 7 outlet		mmWC
R10.2	Temperature at Component 7 outlet		° Celsius
R11	Component 8: <i>(Air pre-heater/Water pre-heater/ Economizer/Gravity Settling Chamber/Cyclone/Scrubber/ Bag Filter/ESP)</i>		
R11.1	Pressure at Component 8 outlet		mmWC
R11.2	Temperature at Component 8 outlet		° Celsius
